QUALITY MATERIALS

At Thipha Cable, input materials are always selected according to the strictest standards

100%

Clean materials, no impurities, are assessed for quality risks from input to finished products.

Selection of reputable suppliers through bidding

Ensure standard raw materials

We understand that in order to create a good product, input materials play a very important role in the product creation process, so our input sources always prioritize importing from countries with advanced technology such as the USA, Australia, Chile, Russia, Korea, India.

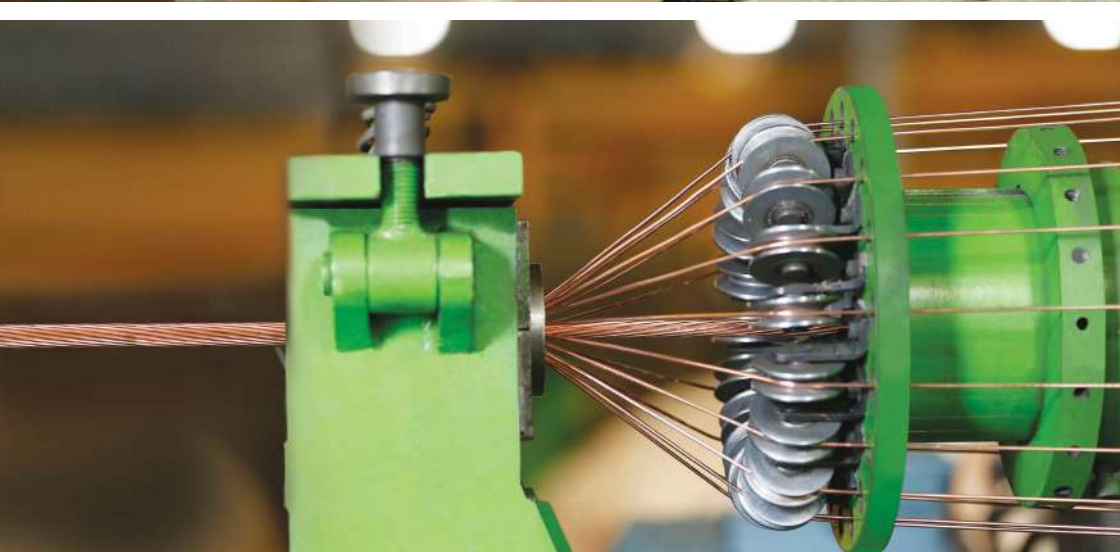

The background image shows a large industrial facility, likely a cable manufacturing plant. On the left, there is a tall blue vertical structure with several large, silver, disc-shaped components (possibly insulators or spools) attached to it. In the foreground, a large yellow cable reel is visible, with a thick black cable wound around it. The floor is concrete, and the walls are made of corrugated metal. The lighting is bright, coming from overhead industrial lights.
